Objects

$\forall_{x \in \mathbb{N}} \; x A_1 \; x B_1 \; x C_1 \ldots \times \beta_1^{\gamma} \quad x \in \mathbb{N}$

$\Leftrightarrow \; x \Delta_2 \ldots$

$\Leftrightarrow \; x A_3 \ldots$

$\Leftrightarrow \; \ldots$

$x A_n \quad \beta$

$\gamma \; x = Y_n \quad x \in \mathbb{N}, \emptyset$

so for some existing or not $x = \emptyset \; x \in \mathbb{N}$

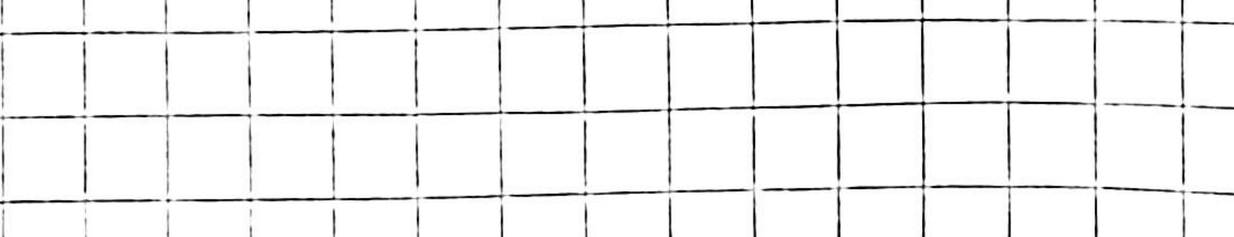
any current state can be described through the reduced table of Universumstein when ascribing names (categories)

sodass β der Anzahl der Wörter zum Beschreiben des Universums braucht W_t demnach mindestens der Anzahl der Faktoren entspricht

$\beta < W$

also Universumstein is equal the Universe but different in Meta only

$\times \beta_n = 1 U$



→ this is like increasing the "auflösung"
